**RADIOACTIVITY**

Source: Tritium contamination from processing operations.

Uncertainty: The waste stream is in-situ and has not yet been characterised. Activities are indicative only.

Definition of total alpha and total beta/gamma: Where totals are shown on the table of radionuclide activities they are the sums of the listed alpha or beta/gamma emitting radionuclides plus 'other alpha' or 'other beta/gamma'.

Measurement of radioactivities: -

Other information: The waste stream is in-situ and has not yet been characterised. Activities are indicative only.
