Comment on planned treatments:

It is intended that the waste stream will be disposed of via controlled burial to an off-site landfill, therefore no waste containers will be produced. Disposal is expected in 1m3 bags to landfill.

RADIOACTIVITY

WASTE STREAM**5C329****DIDO Reactor Decommissioning VLLW and LA-LLW**

Source:	Contamination as a result of past operations.
Uncertainty:	-
Definition of total alpha and total beta/gamma:	Where totals are shown on the table of radionuclide activities they are the sums of the listed alpha or beta/gamma emitting radionuclides plus 'other alpha' or 'other beta/gamma'.
Measurement of radioactivities:	Specific activity estimates are based on consignments from this stream in 2012. These are the best estimates currently, but some areas have yet to be characterised, and so values may change as more data becomes available. Activities decayed to reflect arising date for 2019 UKRWI.
