TREATMENT, PACKAGING AND DISPOSAL

Planned on-site / off-site treatment(s):

Treatment	On-site / Off site	Stream volume %
Low force compaction		
Supercompaction (HFC)	On-site	30.4
Incineration	Off-site	13.4
Solidification		
Decontamination		
Metal treatment	Off-site	0.22
Size reduction		
Decay storage		
Recycling / reuse		
Other / various		
None		56.0

Comment on planned treatments:

All high force compaction takes place in WAMAC. For Inventory purposes, it is assumed that Supercompaction will continue after the closure of WAMAC in 2028. Waste not requiring treatment is out of scope metal, VLLW or direct disposal to LLWR.

Waste Characterisation Form (WCH): The waste meets the LLWR's Waste Acceptance Criteria (WAC). The waste has a current WCH. Differences exist between Inventory information and current WCH. Materials and radioactivity data have been taken from the current WCH, but data on waste volumes and waste routes are based on the Waste Forecasting database as this information is more recent.

Waste consigned for disposal to LLWR in year of generation: Yes.

Non-Containerised Waste for In-Vault Grouting: (Not applicable to this waste stream)

RADIOACTIVITY

Source: The activity has arisen as a result of contamination from fuel and early reprocessing operations.

Uncertainty: The uncertainty associated with the fingerprinting analysis is likely to be low, however the volumes and total activity information (and possibly some other assumptions) are likely to be more notional and thus more uncertain.

Definition of total alpha and total beta/gamma: Where totals are shown on the table of radionuclide activities they are the sums of the listed alpha or beta/gamma emitting radionuclides plus 'other alpha' or 'other beta/gamma'.

Measurement of radioactivities: Specific activity data is based on data in the corresponding WCH, which in turn maps an estimated total activity to an analytically derived radionuclide fingerprint.

Other information: The radionuclides have been taken from REM_TP_0116A and are based on the current WCH (Ref: 1S-1S-0-WCH-0-4693 Version 5).
