

WASTE STREAM	5B326	MTR Reprocessing Plant ILW
---------------------	--------------	-----------------------------------

SITE Dounreay
SITE OWNER Nuclear Decommissioning Authority
WASTE CUSTODIAN Dounreay Site Restoration Limited
WASTE TYPE ILW
 Is the waste subject to Scottish Policy: Yes

WASTE VOLUMES

		Reported
Stocks:	At 1.4.2022.....	2.2 m ³
Future arisings -	1.4.2022 - 31.3.2023.....	7.5 m ³
	1.4.2023 - 31.3.2024.....	7.5 m ³
	1.4.2024 - 31.3.2025.....	7.5 m ³
	1.4.2025 - 31.3.2026.....	7.5 m ³
	1.4.2026 - 31.3.2027.....	7.5 m ³
	1.4.2027 - 31.3.2028.....	7.5 m ³
	1.4.2028 - 31.3.2029.....	7.5 m ³
	1.4.2029 - 31.3.2030.....	7.5 m ³
	1.4.2030 - 31.3.2031.....	5.0 m ³
	1.4.2031 - 31.3.2032.....	1.7 m ³
	1.4.2032 - 31.3.2033.....	1.7 m ³
	1.4.2033 - 31.3.2034.....	1.7 m ³
	1.4.2034 - 31.3.2035.....	0.4 m ³
Total future arisings:		70.5 m ³
Total waste volume:		72.7 m ³

Comment on volumes: It should be noted that the DSRLs using a provisional LifeTime Plan (LTP) and that arisings dates are subject to change. There has been a change in the pond sludge treatment strategy which has reduced the ILW waste volumes.

Uncertainty factors on volumes: Stock (upper): x 1.02 Arisings (upper) x 1.2
 Stock (lower): x 0.98 Arisings (lower) x 0.8

WASTE SOURCE Contaminated fuel reprocessing plant hardware, concrete shielding. Pond sludge

PHYSICAL CHARACTERISTICS

General description: Fuel reprocessing plant hardware, e.g. vessels, pond equipment and pipework and concrete shielding. Steel vessels will be cut to an economic size and concrete shielding will be size reduced.
 Physical components (%vol): Cell Contents (inc Vessels& pipework) (~45%), pond equipment (~45%), concrete (~10%). Small volume of treated sludge (< 1%).
 Sealed sources: Not yet determined.
 Bulk density (t/m³): 0.72
 Comment on density: The density figure is based on consignor's records.

CHEMICAL COMPOSITION

General description and components (%wt): Aluminium (0.15%), Brick/Rubble (22.48%), Cadmium (0.02%), Cementitious material (e.g. concrete) (5.11%), Copper (0.03%), Inorganic sludges and flocs (0.16%), Lead (1.04%), Mild Steel (36.93%), Plastic (0.04%), Stainless steel (32.54%), Titanium (0.89%), WEEE not containing hazardous components (0.05%), Wood/ Wood composite (0.55%),
 Chemical state: Neutral
 Chemical form of radionuclides: -
 Metals and alloys (%wt): The items will be of variable shape and thickness, from disused vessels and pipework.

WASTE STREAM	5B326	MTR Reprocessing Plant ILW
---------------------	--------------	-----------------------------------

	(%wt)	Type(s) / Grade(s) with proportions	% of total C14 activity
Stainless steel.....	32.5	Stainless steel assumed to be 316.

Complexing agents (%wt): No

(%wt) Type(s) and comment

- EDTA.....
- DPTA.....
- NTA.....
- Polycarboxylic acids.....
- Other organic complexants.....
- Total complexing agents..... 0

Potential for the waste to contain discrete items: Yes. Hand tools, Durable engineered steel structures, concrete blocks, uncompact putty drums

PACKAGING AND CONDITIONING

Conditioning method: RHILW will be packaged into 500l drums for long term storage. CHILW will be supercompacted with the pucks being encapsulated into 500L drums.

Plant Name: RHILW and CHILW Repackaging Facilities

Location: Dounreay

Plant startup date: 2026 & 2028

Total capacity (m³/y incoming waste): -

Target start date for packaging this stream: 2026

Throughput for this stream (m³/y incoming waste): ~8.0

Other information: CHILW and RHILW Repacking plant are in design phase. Assume unconstrained.

Likely container type:	Container	Waste packaged (%vol)	Waste loading (m ³)	Payload (m ³)	Number of packages
	500 l drum	100.0	~0.242	0.5	301

Likely container type comment: The conditioning factor for RHILW will be about 1.7 while that for CHILW is about 0.5.

Range in container waste volume: It is estimated that between 2 and 8 CHILW pucks will be placed into each 500l drum with the average being 5 drums per 500L drum. A small percentage of drums may not be suitable for supercompaction and will be directly immobilised into the 500l drum. Assume 3:2 Z6033 to 500L drum ratio.

Other information on containers: -

Likely conditioning matrix: Cement

Other information: -

Conditioned density (t/m³): ~2.5

Conditioned density comment: The density is likely to be around 2-3 te/m3

Other information on conditioning: -

Opportunities for alternative disposal routing: No

RADIOACTIVITY

Source:	The facility is a research materials test reactor fuel reprocessing plant. The source of radioactivity from MTR fuel reprocessing work previously carried out in the facility (and also from other research reactors).
Uncertainty:	The estimates given for arisings are based off consignors data. The data for stocks are a proportion of the activity taken from the RHILW Solid and CHILW drummed LoC. RHILW Solid and CHILW drummed LoCs provide a generic activity for all CHILW / RHILW wastes in store.
Definition of total alpha and total beta/gamma:	Where totals are shown on the table of radionuclide activities they are the sums of the listed alpha or beta/gamma emitting radionuclides plus 'other alpha' or 'other beta/gamma'.
Measurement of radioactivities:	From LoC data and consignment data.
Other information:	Specific Activities used are from 2019 UKRWI decayed to 2022. Arisings listed in datasheet as LLW. However, this is due to the CHILW content being based on a limited dataset. This dataset involves previously consigned CHILW drums which have been deemed ILW due to a high U235 content rather than activity. This has diluted the overall specific activity when combined with the RHILW component.

Bands (Upper and Lower)

- A a factor of 1.5
- B a factor of 3
- C a factor of 10
- D a factor of 100
- E a factor of 1000

Note: Bands quantify uncertainty in mean radioactivity.

Code

- 1 Measured activity
- 2 Derived activity (best estimate)
- 3 Derived activity (upper limit)
- 4 Not present
- 5 Present but not significant
- 6 Likely to be present but not assessed
- 7 Present in significant quantities but not determined
- 8 Not expected to be present in significant quantity
