**RADIOACTIVITY**

Source: Contamination from the filtration of fuel pond water.

Uncertainty: The values quoted are indicative of the activities that might be expected.

Definition of total alpha and total beta/gamma: Where totals are shown on the table of radionuclide activities they are the sums of the listed alpha or beta/gamma emitting radionuclides plus 'other alpha' or 'other beta/gamma'.

Measurement of radioactivities: Specific activities have been estimated from available data.

Other information: Specific activity is a function of Station operating history.
