

WASTE STREAM	9D60	Sand in Sand Pressure Filters - PWTP
---------------------	-------------	---

SITE Hinkley Point A
SITE OWNER Nuclear Decommissioning Authority

WASTE CUSTODIAN Magnox Limited

WASTE TYPE ILW

Is the waste subject to Scottish Policy: No

WASTE VOLUMES

		Reported
Stocks:	At 1.4.2022.....	19.2 m ³
Total future arisings:		0 m ³
Total waste volume:		19.2 m ³

Comment on volumes: All Pond Water Treatment Plant Sand Pressure Filters are planned to be emptied of filter media in a single campaign.

Uncertainty factors on volumes: Stock (upper): x 1.1 Arisings (upper) x
 Stock (lower): x 0.9 Arisings (lower) x

WASTE SOURCE Sand from sand pressure filters in the Pond Water Treatment Plant. Sludge and solids are removed by mechanical filtration through a bed of sand which is then backwashed into sludge tanks. The filters will be emptied of sand when the ponds are decommissioned.

PHYSICAL CHARACTERISTICS

General description: Mineral sand, containing high levels of activity due to the significant quantities of entrained sludge within the sand filter bed. Expected to be emptied using a vacuum retrieval method.

Physical components (%vol): Sand (90%), Sludge (10%).

Sealed sources: The waste does not contain sealed sources.

Bulk density (t/m³): 2.6

Comment on density: The density varies between 2.5 - 2.7 t/m³.

CHEMICAL COMPOSITION

General description and components (%wt): Sand (90%), Sludge (10%).

Chemical state: Neutral

Chemical form of radionuclides: H-3: Most tritium is expected to be present as water but some may be present in the form of other inorganic compounds or as organic compounds.
 C-14: Carbon-14 may be present as graphite.
 Se-79: The selenium content is insignificant.
 Tc-99: The technetium content is insignificant.
 Ra: The radium content is insignificant.
 Th: The thorium content is insignificant.
 U: The chemical form of uranium isotopes has not been determined but will probably be uranium oxides.
 Np: The chemical form of neptunium has not been determined.
 Pu: The chemical form of plutonium isotopes has not been determined but will probably be plutonium oxides.

Metals and alloys (%wt): Any metals will be present as small particles in trace quantities. There are likely to be traces of metals and metallic corrosion products, including magnesium and ferrous metals.

	(%wt)	Type(s) / Grade(s) with proportions	% of total C14 activity

WASTE STREAM**9D60****Sand in Sand Pressure Filters - PWTP**

Potential for the waste to contain discrete items:

No. In & of itself not a DI; context will define if likely to contain any "rogue" items that could be (unlikely as sand from SPFs)

PACKAGING AND CONDITIONING

Conditioning method: Encapsulation into 3m3 boxes

Plant Name: -

Location: Hinkley Point A Site

Plant startup date: -

Total capacity (m³/y incoming waste): -

Target start date for packaging this stream: 2023

Throughput for this stream (m³/y incoming waste): -

Other information: -

Likely container type:	Container	Waste packaged (%vol)	Waste loading (m ³)	Payload (m ³)	Number of packages
	3m ³ box (round corners)	100.0	1.5	2.9	13

Likely container type comment: -

Range in container waste volume: -

Other information on containers: -

Likely conditioning matrix: Not specified

Other information: -

Conditioned density (t/m³): -

Conditioned density comment: -

Other information on conditioning: -

Opportunities for alternative disposal routing: -

Baseline Management Route	Opportunity Management Route	Stream volume (%)	Estimated Date that Opportunity will be realised	Opportunity Confidence	Comment
-	-	-	-	-	-

RADIOACTIVITY

Source: Activity from the cleanup of Fuel Storage Pond Water.

Uncertainty: Activity retained on the filter media cannot be known with accuracy until the filters are decommissioned and emptied.

Definition of total alpha and total beta/gamma: Where totals are shown on the table of radionuclide activities they are the sums of the listed alpha or beta/gamma emitting radionuclides plus 'other alpha' or 'other beta/gamma'.

Measurement of radioactivities: Based on activities found on sludge.

Bands (Upper and Lower)

- A a factor of 1.5
- B a factor of 3
- C a factor of 10
- D a factor of 100
- E a factor of 1000

Note: Bands quantify uncertainty in mean radioactivity.

Code

- 1 Measured activity
- 2 Derived activity (best estimate)
- 3 Derived activity (upper limit)
- 4 Not present
- 5 Present but not significant
- 6 Likely to be present but not assessed
- 7 Present in significant quantities but not determined
- 8 Not expected to be present in significant quantity
