RADIOACTIVITY

Source: The radioactivity has arisen both from activation and contamination while the materials were used in reactor or pond areas.

Uncertainty: The values quoted are notional, representing an indicative Total Activity scaled to the 9D11 LLW Incinerator Ash fingerprint.

Definition of total alpha and total beta/gamma: Where totals are shown on the table of radionuclide activities they are the sums of the listed alpha or beta/gamma emitting radionuclides plus 'other alpha' or 'other beta/gamma'.

WASTE STREAM**9D83****Incinerator Ash (ILW)**

Measurement of
radioactivities:

As per HINA/WASTE/76 (PROG/HPA/SILW/0069) this update was derived by scaling
extant notional estimates of Total Activity to the 9D11 Incinerator Ash LLW Fingerprint.

Other information:

Specific activity is a function of Station operating history.
