RADIOACTIVITY

Source: -

Uncertainty: The values quoted represent an indicative Total Activity derived from Waste Consignment Information and mapping to 9D930 fingerprint.

Definition of total alpha and total beta/gamma: Where totals are shown on the table of radionuclide activities they are the sums of the listed alpha or beta/gamma emitting radionuclides plus 'other alpha' or 'other beta/gamma'.

Measurement of radioactivities: This update provides data transposed from Table 4 of the desktop review in project report HPA/PROG/SILW/0123. Individual values for Pu-239, Pu-240, Cm-243 and Cm-244 derived from values provided for the Pu-239+240 and Cm-243+244 nuclide pairs assuming same split as that applied to similar update for wastestream 9D930
